Such kind and caring staff! I am new to Austin and am more than thankful I chose to be a new patient at their dentistry. Not only did they make me feel welcome, they genuinely cared to deliver the proper cleaning I needed and thoroughly explained to me what needed to be done as well as what I needed to do at home to follow. Amazing communication and patience! I highly recommend, and will be referring anyone I come across to become a new patient of theirs!

Dr. Miller's office is incredible! I came here after a bad experience at another office in town and I am so glad I did. EVERYONE from the office staff to Dr. Miller himself was so kind and understanding. Dr. Miller made sure I thoroughly understood what all of my options for treatment were and why I would need them. I felt at ease with my upcoming procedure because of that even though I have terrible dental anxiety. Ariel, the dental assistant, also deserves a shoutout as she explained the terminology as well as my x-rays to me in a way I could easily understand. I am so glad I found this practice and greatly look forward to coming back in the future! Y'all definitely have a new lifelong patient in me!

Awesome experience here 🙌 Dr. Miller and his staff made me very comfortable while providing great care. I had chipped my bonding done by another dentist, but that office was closed today due to inclement weather. However, North Austin Dentistry was open! I called in the morning and they were able to fit me in an hour later for my bonding as a new patient, and even gave me a different and preferred solution to treatment than my previous dentist!

Dr. Miller and his team are phenomenal. I am a very nervous patient and have tried multiple dentists over the years, but my search is over. I recently had 2 wisdom teeth removed and the procedure went fantastically well. I will be a Dr. Miller patient for life.

I had a great experience with tooth extraction and overall treatment with Dr Miller. I reached out with a request for wisdom tooth extraction on both the sides. I had an almost painless experience in the sense that even though the extraction was to impact both sides of my jaw, I could resume eating to normal in 5 days, with no pain. My extraction wound got healed really very soon. I would highly recommend Dr Miller to anyone who wants an honest consultation and opinion on dental issues. The staff members at the clinic are wonderful too.

Haven't been to a Dentist in about 5 years thanks to snobby dentists that have shamed me for my teeth and recommending treatments that I did not need. This was NOT the case at North Austin Dentistry. Dr. Miller is the first dentist I have seen in my 25 years of life that not only treated me like an equal but also commended me for taking good care of my teeth (despite the couple of cavities that he found) and actually took my pre-existing conditions into consideration before recommending my next treatments. He and his staff are wonderfully fun and professional and I could not recommend him more than I currently do. One visit was enough to make me a long term patient.

A huge thank you to Dr. Miller and his staff for making me feel welcomed and at home in their office. Cannot wait for the next visit!

So I will start by saying, I have extremely bad anxiety and I have had bad dental issues this past year. This dental office has been absolutely amazing compared to the others. Dr. Miller warns you about the noise and sensation so you aren't surprised. The hygienists are also super kind. I recommend, especially those who may have anxiety when visiting the dentist.

I've been a patient here for several years. The staff at North Austin Dentistry are warm, knowledgeable, respectful of your time and take great care of your teeth. I especially appreciate the ease of scheduling and the frequent appointment reminders. If you are looking for a new dentist office in North Austin, NAD is an excellent option.

Dr Miller and his staff are amazing. He is a great dentist; he takes the time to listen and addresses my concerns at every visit. I have had multiple root canals, and always makes sure I am comfortable and pain free. Scheduling is very easy and he and his staff are very professional and kind. 5 stars all around!

During my initial visit, Dr. Miller was able to create a replacement for a crown that had never fit in my mouth properly, which brought me so much relief! Dr. Miller and his staff members are truly legit. The utmost in professionalism and courtesy. They have gained a patient for life!

Dr. Miller and the entire staff at North Austin Dentistry are truly amazing! This was my first time at the dentist after 5 years without going and I was very nervous. The staff are very personable and made me feel comfortable for my first time back. They are very informative and go slow in telling you useful information. Lindsey at the front is super accommodating with getting patients set up for appointments.

I will continue seeing Dr. Miller and staff along with recommending to friends!

I've been seeing Dr. Miller for several years now. He was able to describe my mouth in detail after having not seen him in a couple years. I had 2 teeth extracted today, it was quick and he made sure my pain level was minimal. Dr Miller knows his stuff and is straight forward.

The receptionists and assistants were very welcoming and friendly. There were a few new faces and I didn't get all of their names. But Val has been there for a while now and she's awesome!

Dr. Miller is THE dentist you look for and want in your "ever-on-going" health journey. I found him on Google when I was having pain from impacted wisdom teeth. From his staff, to his consultative, super friendly, but confident approach, I trusted him to take out my wisdom teeth. And the rest is history. Flash forward 2 years later, I'm so grateful I found him. I'm no longer terrified dentist appointments, I'm able to keep up with what's needed to keep my oral hygiene on track and look forward to the office's killer music selection. Don't look any further.

Had tooth pain and got it pulled. Process was fast and the options for further care didn't come off as pushy. It felt like genuine concern and that alone makes the visit excellent! Super friendly staff, caring, and professional. I am quite fond of this place and it's going to be my go to.

Dr. Logan Miller is an excellent dentist, and he has the loveliest staff. The office manager Lindsey is fantastic, so are all his very kind and friendly dental assistants.

My husband and I have been patients at North Austin Dentistry since 2017. Over the past three years I needed one minor repair when I broke a small piece out of my front tooth, which you can't tell at all that there has been any damage, because of the terrific job Dr. Miller did. I also see him for the regular cleanings, which are always done very thoroughly.

This time I had to get my first crown in a lower back tooth. Dr. Miller did a fantastic job! He uses state-of-the-art technology (Sirona), and therefore it is all done in one procedure. Not like in the old days when it usually took three visits for the preparation of the tooth, the dental casts (where you had to bite in that horrific paste) and then for the actual crown getting placed and fitted.

Dr. Miller uses a computer program that creates the model of the crown, then he makes it in his practice and fits it -- all in one visit! The crown itself is ceramic and fits so well that I can't tell any difference in my bite. The new tooth/the crown itself actually feels super nice and smooth and looks much better than my own old tooth.

Dr. Miller makes sure you don't experience any pain. Before the numbing a topical anesthesia is applied so that the injection is very bearable. The amount of numbness was perfect, too, since it already wore off on my way home. I didn't have any soreness the next day either. Believe me, I don't enjoy dentist visits at all, but Dr. Miller and his staff make it the most enjoyable possible. I really appreciate Logan's friendly, calm demeanor, and he has a great sense of humor, too.

Best dentist and crew in town!
